Estimating patient's life expectancy after a successful kidney transplant using machine learning methods

Kyrylo Stadniuk

January 23, 2023

1 Abstract

2 Introduction

2.1 Brief History of the field

2.2 Introduction to the problematic of kidney exchange.

2.3 Introduction to the topic of Artificial Intelligence and Machine learning and its applications in medicine and in KEP in particular.

3 Data acquisition

metody...

4 Data preprocessing

implementace a porovnani tech modelu...

5 Testing of different models (transfer learning, ml algorithms,....)

6 Application of the model in TXMatching

7 Conclusions
